

APPENDIX F
RECORD LAYOUTS

EXPLANATION OF FIELD TYPES IN UI TAX EXTRACT FILES

There are eight types of fields in Appendix A and the record layouts for the five tax extract files.

1. **Required.** These fields cannot be blank. They are primarily mandatory dates and dollar values.
2. **Valued.** These fields have text values that must be entered. All of the allowable text values for each field are listed in the record layout.
3. **Optional.** These fields are gray in Appendix A. The software does not look at these fields at all. Any values can be entered, or they can be left blank.
4. **Must be blank.** These are fields where the presence of data indicates an error. Therefore, they must be left blank.
5. **System generated.** These fields are generated by the DV software and data should not be placed in these fields in the extract files. These fields are primarily time lapse and age fields.
6. **Not applicable.** These fields do not apply to particular subpopulations.
7. **Conditionally required.** Data are included in these fields if the data are present in the state's system.
8. **User Field.** These fields may be used by the state for any additional data that would be helpful in validating a record or researching validation errors.
